

Butterfly Mobile

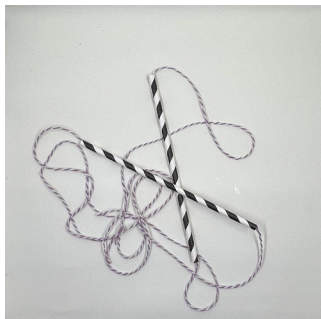

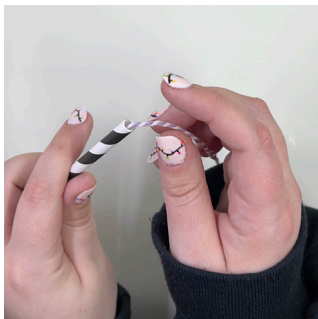

Supplies:

- 11"x14" sheets of Smart-Fab
- String/Thread
- Pipe Cleaners
- 2 Straws
- Scissors

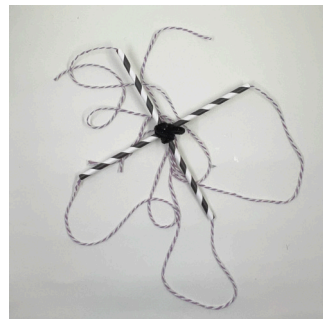

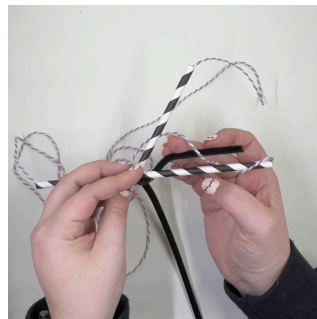

Steps to Make a Butterfly Mobile

- 1** Cut two pieces of string, about arm's length. Feed a piece of string through each straw.

2

Make an X with the straws. Wrap a pipe cleaner around where the straws cross to tie them together. Use any excess length of the pipe cleaner to make a loop to hang the mobile.

Steps to Make a Butterfly Mobile

3

Choose one color of Smart-Fab. Cut out two squares (about 6 inches) and round the corners of one. Choose another color and do the same thing, but make them a bit smaller.

4

Accordion fold both shapes, rounded one from flat edge to flat edge, but start from the corner on the other. Hold them together with the rounded corner piece on the bottom.

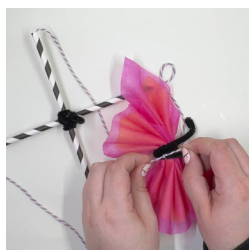

5

Fold a pipe cleaner in half and wrap it around the center of the butterfly. Curl up the ends of the pipe cleaner to create the antenna. Repeat steps 3-5 with different colors 3 more times.

6

Once you have 4 butterflies, tie the ends of the strings to your butterfly antennas.

Hang up your Butterfly Mobile and enjoy!
