

## CTE programs have many benefits. WE CAN HELP YOU REALIZE THEM.

CTE programs benefit all K-12 students, enhancing academic achievement, developing lifelong skills, and increasing employability. Research shows that effective learning environments play a significant role in student success.

At School Specialty®, our mission is to help you create effective learning environments – and we have more education experts and resources than anyone to help achieve it.

A dedicated local team can partner with you to understand your needs and tailor solutions using our exclusive high-quality, comprehensive Classroom Select® brand, and other national brands.

Whether you need dedicated labs or flexible, multi-purpose spaces, let us help you create CTE environments that help every student succeed.

# We're your 'DESIGN, PROJECT MANAGEMENT & MORE' partner

Projects by Design® is our turnkey, collaborative, and complimentary service designed to help you envision and install dynamic, future-ready learning spaces.

We support you every step of the way from initial discovery to design, delivery to development, through installation and beyond.

We can be your single source for products, design, and project management resulting in one P.O. for your entire project.

## OUR PROVEN PROCESS

### DISCOVER

Discovery meeting, project roadmap, alignment on budget and vision.

### DESIGN

Design and product recommendations presented in detailed color renderings. Final price proposals — detailed room-by-room.

### DELIVER

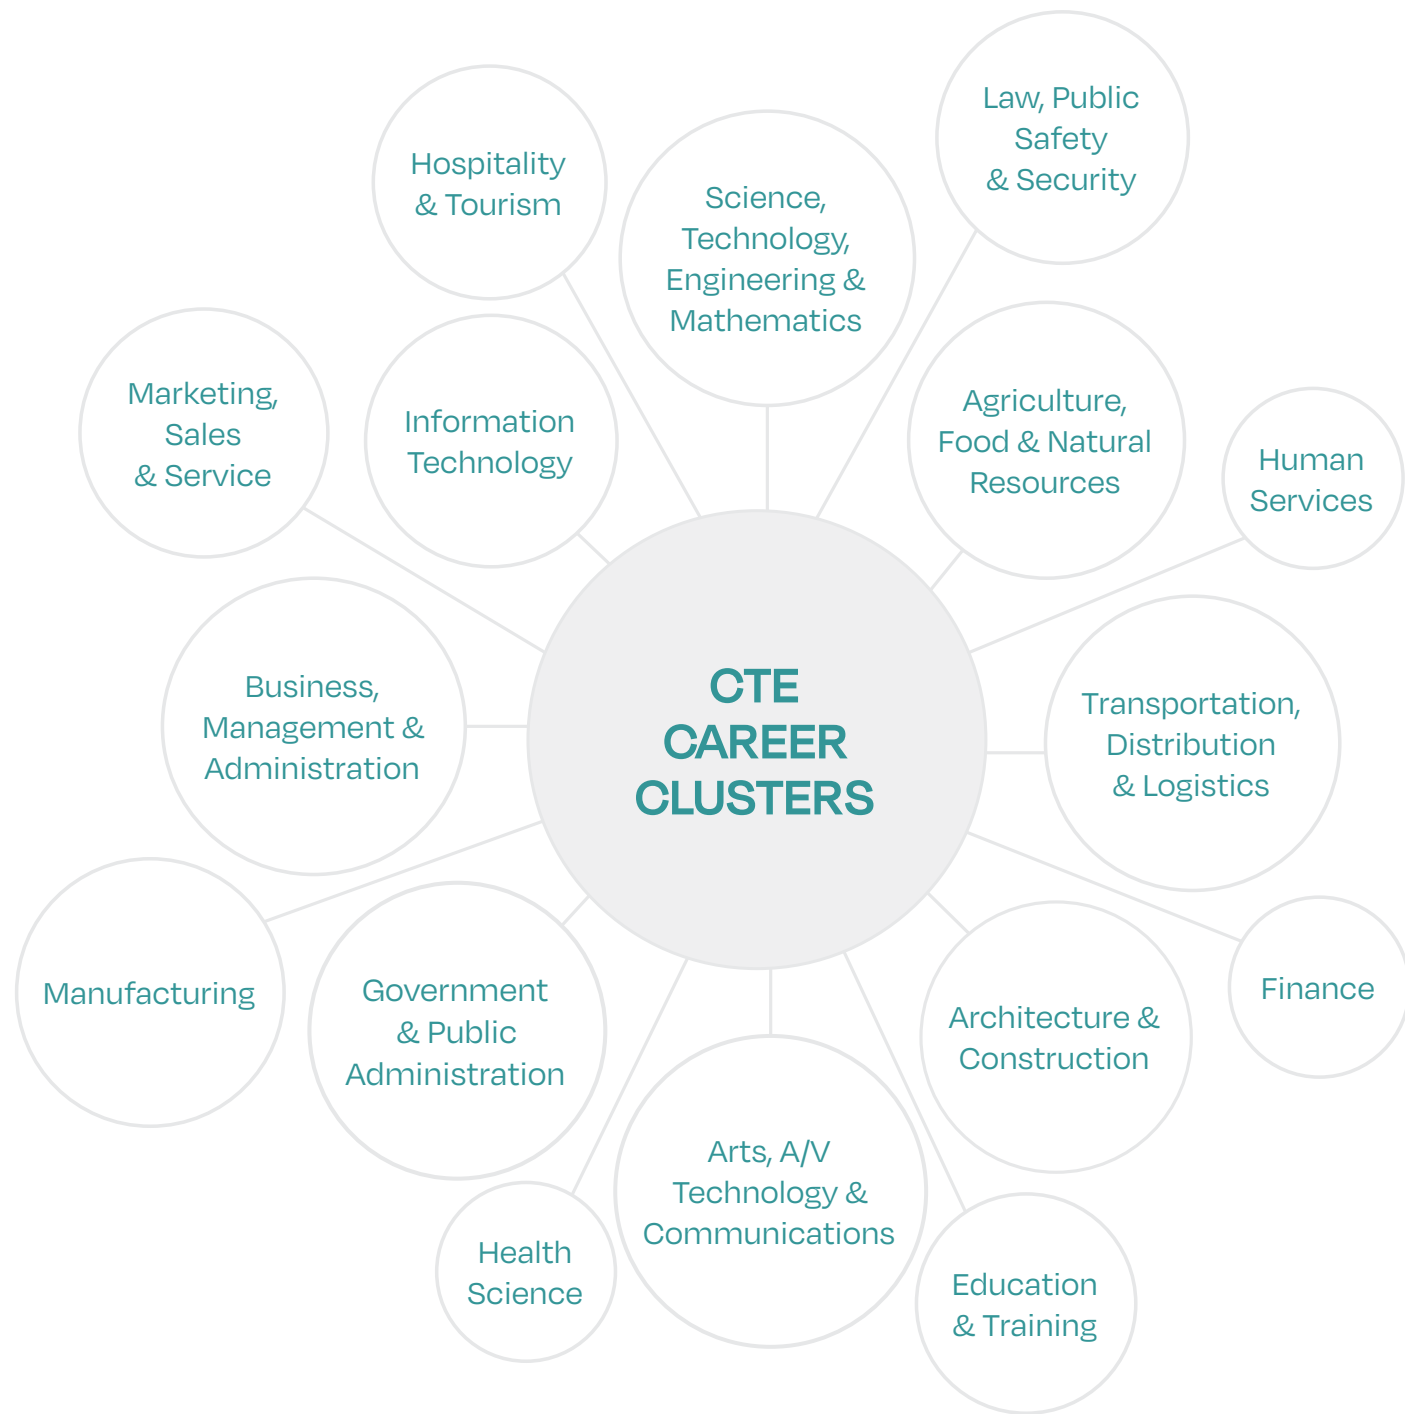

On-site supervision of the entire post-award process and management of all logistics.

### DEVELOP

A variety of half- and full-day courses to help you get the most out of your new environments.

## Discover the possibilities for your CTE ENVIRONMENTS

Whether you are creating a dedicated lab for a single CTE cluster or need a flexible, multi-purpose solution, a well-equipped Career & Technical Education area can fuel discovery while developing college and career skills. Solutions like tables of varied shapes and heights with storage underneath to house materials and tools will help give students the tools they need to explore their interests, nurture their skills, and prepare for the future.

**Outdoor Drone Safety Tips**

- Follow local drone rules and regulations**  
Follow local laws and regulations regarding drone use.
- Create a safe flying environment**  
Choose an open flying zone and never fly above or around people or moving ground or air vehicles.
- Configure outdoor failsafes**  
Properly set home location and safety perimeter.
- Follow your pre-flight checklist**  
Ensure your drone is damage free and ready to fly.

- F** Classroom Select® Royal Seating® Recovery Lounge, Item# 1503646

**Photosynthesis & Respiration**

**Photosynthesis**  
 Plants use sunlight and carbon dioxide to produce glucose and oxygen. This process occurs in the chloroplasts of plant cells.

**Cellular Respiration**  
 Cells use glucose and oxygen to produce energy (ATP) and carbon dioxide. This process occurs in the mitochondria of cells.

**The Carbon Cycle**

Carbon dioxide is taken up by plants and used for photosynthesis. Plants release oxygen into the atmosphere.

Animals breathe in oxygen and release carbon dioxide into the atmosphere.

Decomposers break down dead organic matter, releasing carbon dioxide back into the atmosphere.

Carbon dioxide is also taken up by the oceans and used by marine plants.

**All About Plants**

Plants are essential for life on Earth. They provide food, oxygen, and shelter for many organisms.

Plants have different parts, including roots, stems, leaves, and flowers. Each part has a specific function.

**Ecosystems, Food Chains & Food Webs**

Organisms in an ecosystem interact with each other and their environment. Energy flows through food chains and food webs.

Producers (plants) capture energy from the sun and convert it into food. Consumers (animals) eat producers or other consumers.
