STEP 1

In this step of the installation, the vertical support legs need to be inserted into the designated slots on the base structure. Place the desk upside down on a stable, non-abrasive soft surface to avoid any scratching. Carefully align the bottom of the leg tubes with the mounting points on the base, as indicated by the red arrows in the diagram. The close-up view highlights the precise connection point (1), ensuring a secure fit. Gently slide each leg down into the base until fully inserted. Ensure both legs are evenly aligned before proceeding to the next step. Proper alignment is crucial for stability and structural integrity.

STEP 2

In this step of the installation, the leg inserts with glides need to be connected to the leg uppers. Align the leg uppers with the openings on the leg inserts, as indicated by the red arrows in the diagram. Step (1) highlights the insertion point where the leg insert should be carefully placed into the leg upper. Step (2) focuses on securing the connection using screws on the side. Insert and tighten the screws to ensure stability and proper alignment, leaving the screw a $\frac{1}{4}$ turn. After setting the leg height, flip the desk over, and make sure the unit is level. Then turn $\frac{1}{4}$ turn and tighten the screws, so the inserts are not wobbly.
