

Snoezelen® Portable Bubble Tube

This lightweight portable bubble tube provides the same benefits as standard bubble tubes only it's compact. A good choice for home use or smaller spaces, the tube offers an opportunity for up-close interaction with the vibrations, colored bubbles and sounds.

FEATURES & BENEFITS

- Bubble tubes are used as a focal tool for sensory regulatory activities or used interactively with encouraging visual tracking, color recognition, physical movement (reaching, looking up) and hand-eye coordination.
- Offers 8 different colors
- Easy to clean, maintain, operate and assemble
- LED lights for maintenance-free use
- Made of solid, durable clear acrylic
- UL/CSA Approved

PRODUCT RECOMMENDATIONS

- We recommend using distilled water and adding BCB Water Treatment Fluid to the bubble tube monthly or immediately after a water change to help prevent bacteria, smell, and algae
- Use in well-lit spaces or in darkened environments where their effects are most striking
- Can be used tabletop for individuals in wheelchairs; in principal's office/guidance office/nurse's station as a calming element
- Great for those who want to lay down next to unit - making it great for early childhood or those in wheelchairs
