

Push Pop Sensory Game Instructions

There are multiple ways to play this game.
Here's an example:

1. Each player rolls the dice and presses the number of bubbles they rolled.
2. The first player to push all their bubbles wins the first round and pushes one of the middle bubbles.
3. Whoever wins two of the three rounds is the final winner.
4. Turn the board over and start again.

To extend the length of the game, use only one die.

To make the game more challenging, multiply the numbers on the dice instead of adding.
