

Snoezelen® Abstract Tactile Panels

Abstract Tactile Panel

Midi Abstract Tactile Panel

UV Abstract Tactile Panel

Musical Abstract Panel

Fiber Optic Abstract Panel

These interactive wall panels offer auditory, tactile, and visual sensory elements and is ideal for those requiring multiple sensory inputs. A selection of contrasting textures, fluid shapes, raised and recessed areas, and interactive elements are provided for a fun learning and exploring experience.

FEATURES & BENEFITS

- Ideal for those requiring multiple sensory inputs
- Reinforces eye/hand coordination, concentration, color recognition, and visual perception
- Encourages different grips, movements, and the use of fine motor functions
- Colors and textures may vary
- Frame is constructed of sturdy birch plywood
- To be wall mounted at an appropriate height for the user
- UV model can be installed in a darkened environment with a UV light nearby

PRODUCT BENEFITS

- Musical Abstract Panel offers visual, tactile and audible. Good for exploring and comparing sounds
- Fiber Optic Abstract Panel offers touch and feel with the added benefit of lights; great for users with low vision. Wirelessly control the color of the lights on the panel with the WiFi Controller (#2120147) or Sensory Magic® (#2123708)
- UV Abstract Tactile Panel is best used in a darkened room; for use with a blacklight (#2125015, sold separately); good for low vision
