

Snoezelen® Multifinity Explorer™ Panel

The Multifinity Explorer™ Panel is designed to promote interaction, visual tracking, hand-eye coordination, and cause-and-effect understanding. Packed with sound effects and music, it offers a dynamic multi-sensory experience. The panel features a mirror that enhances depth perception, creating a tunnel-like sensation. This aspect, combined with its ability to control stimulation levels, makes it beneficial for people with autism. The blackened mirror provides a sense of control, which may help them engage in communication with a caretaker.

FEATURES & BENEFITS

- Create over 60 unique and visually stunning infinity effects
- Select from 8 shapes, 11 colors, 6 patterns and 3 speeds
- Accessible and illuminated push buttons
